# Joanna Switzer

## Senior Consultant

As a LEED accredited professional and former commercial interior designer, Joanna has spent nine years in the commercial design and construction industry. Joanna serves clients on renovation and new construction projects for a wide variety of building types. Her expertise lies in architectural interiors with a strong knowledge base on the performance of finish materials.

Through her work, Joanna was inspired to seek an alternative path to serving clients by offering environmentally responsible design options. She has been actively involved on the Board of Directors of the Florida Gulf Coast Chapter of the U.S. Green Building Council since its inception and she has witnessed the sustainability movement gain tremendous momentum throughout the state of Florida.

Recognizing the potential to better serve clients, Joanna made the commitment to become a full-time sustainability consultant in 2006. This has given her the opportunity to help redefine the status quo, contribute to building efficiency, occupant comfort and environmental conservation.
